

DEV SUMMIT 2026

AI Sentinel

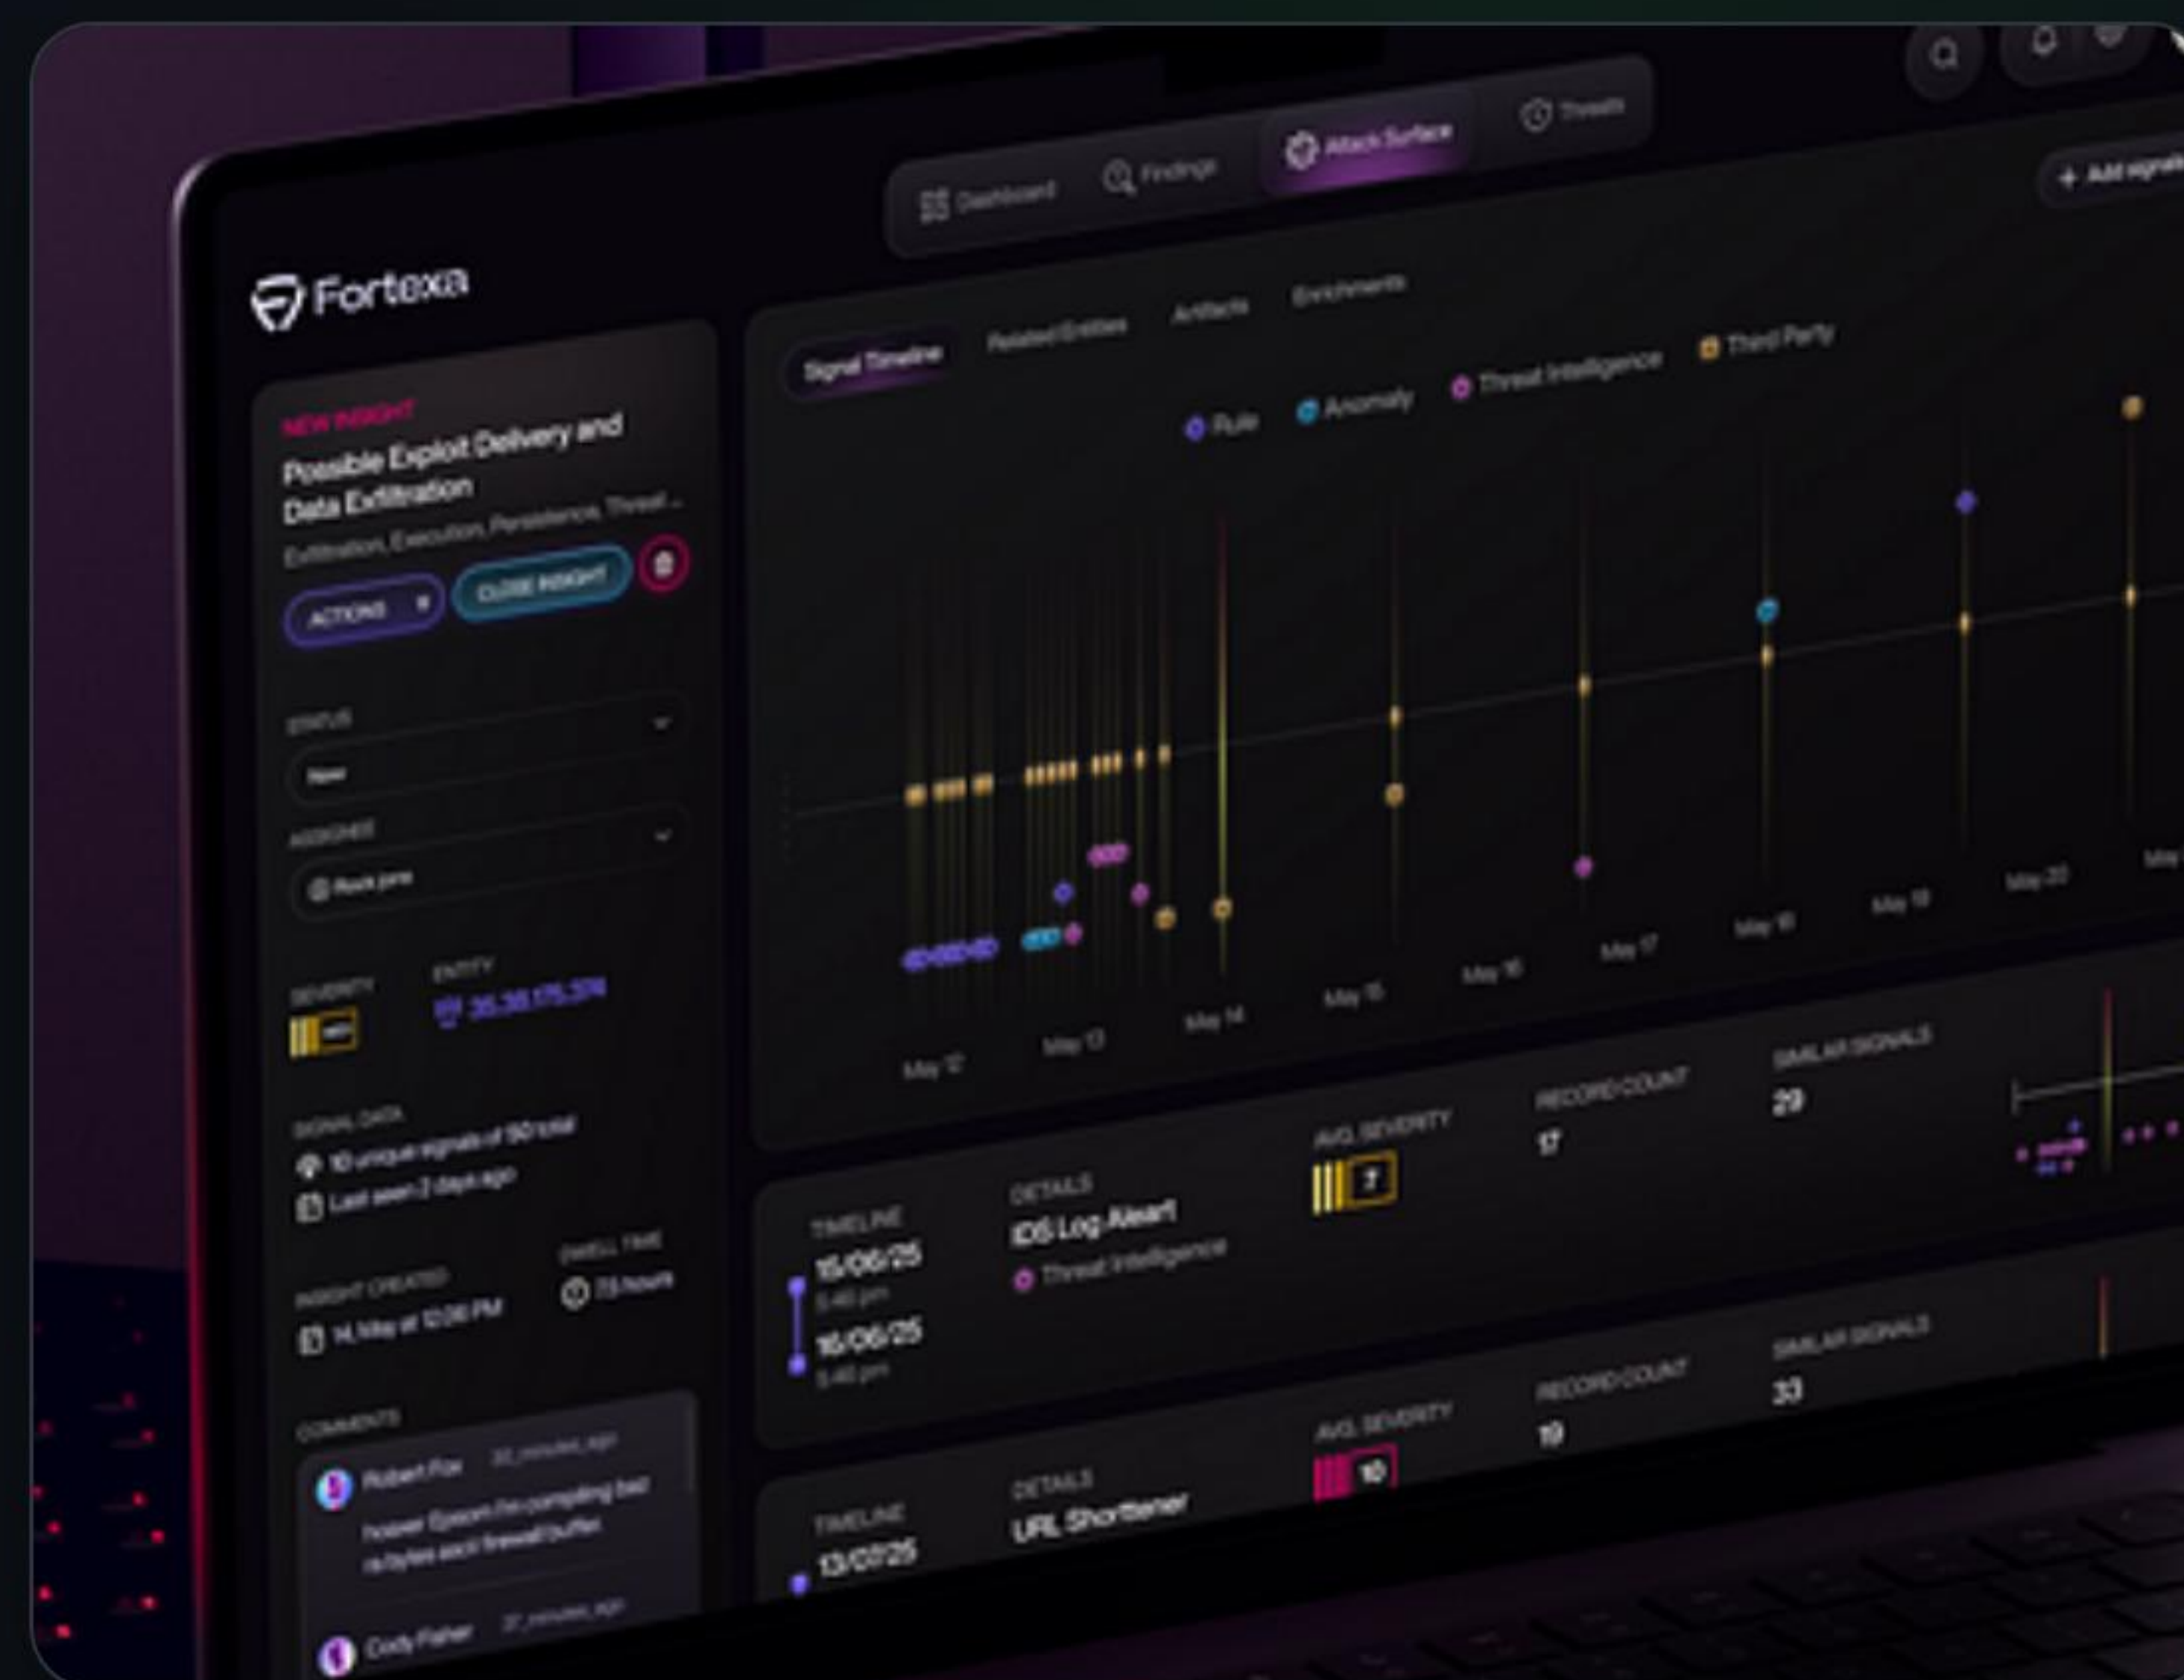

Multi-Agent Auditor & Security Battleground.
Ensuring trust in AI-generated code.

The Coding Problem

Why we need more than just one AI to check our code.

Invisible Vulnerabilities

- ⚠️ **Blind Trust:** 60% of developers deploy AI code without deep security reviews.
- 🛡️ **Ghost Bugs:** Hallucinations that look like working code but create logic flaws.
- 🧑 **Agent Bias:** One model alone cannot see its own mistakes.

The Sentinel Edge

AI Battleground

3 models compete to find the most accurate and safe answer.

Expert Personas

Reviews done by Senior Architect and Cyber Security agents.

Auto-Healing

We don't just find bugs; we generate optimized fixes immediately.

| Performance Benchmark

1.5s

AUDIT LATENCY

Hyper-Scale Audits

Powered by **Groq LPU Architecture**. While traditional pipelines take minutes, AI Sentinel audits in real-time.

3 Parallel Agent Flows Active

How the Engine Works

Multi-Model Consensus

Code is scanned by Llama, Mixtral, and Gemma. Our engine looks for agreement and highlights any risky logic outliers.

The Final Verdict

A "Judge Agent" picks the safest result and provides a 'Super-Prompt' for perfect future code generation.

Secure Audit

Our auditor goes deep into your logic to prevent breaches before they happen.

Cross-file security analysis

Logic flow optimization

100% Production-ready code

Comparison Matrix

Capability	Standard AI Review	AI Sentinel Auditor
Agent Count	Single Model	Multi-Model (3+ Agents)
Security Depth	Generic Patterns	Cyber Security Expert Persona
Review Speed	10-15 Seconds	~1.5 Seconds (Groq)
Fix Quality	Snippet-based	Full Logic Re-optimization

Audit Success Rate

Drastic reduction in undetected vulnerabilities with *Multi-Agent* review.

The Roadmap

Alpha

Agent Battle Ground Core
Completed.

DevSummit

Enterprise API
Integration Tests.

Beta

Public Streamlit Launch
for Hackathon.

Q4 2026

Full DevSecOps Suite
Launch.

Coding the Future

Building an ecosystem where every line of code is verified by a council of experts. Confidence starts with AI Sentinel.

Any Questions?

Thank you for your time. Let's make AI code secure.
